## Enquiry Question of the week

### **6. To what extent did the Spanish change the Maya civilisation?**

A: European invaders and explorers brought foreign diseases against which they had no defence. They also forced them to become Christians, used weapons and treated them cruelly if they didn't obey. The Spanish destroyed many of their temples. Some Maya tribes fought and destroyed each other. Some of the Maya overworked the land and it failed to produce adequate food, so many died. Some Maya do still exist - 31 Mayan languages exist but they face discrimination even today.
