*Achieving Excellence Together in a Caring Community*

Dear Parent(s) / Carer(s),

On Friday 7th February, we will be taking part in the NSPCC's Number Day! The NSPCC have created this day to raise awareness for the work that they do with regards to supporting children and young people.

On Friday, instead of their regular Maths lesson, children will instead complete games, problem solving and different challenges that explore numbers in different ways. This will be planned by their teachers to be relevant for each year group.

To celebrate this, children will be asked for one of their Dip and Do options to get creative and design a number hat! Below are a few photos of possible examples but it really is a chance for your child to be creative! There will not be a prize or formal competition, it is really to get children excited about decorating an item with a number focus! On Friday 7th February children will wear their normal school uniform but with their number hat as well!

Thank you in advance for helping your child with their hat, but also for sharing in their excitement as we explore numbers! If anyone feels that they can contribute, you can go to "School Gateway - Payments" and there is a flexible donation option to be able to donate as much or as little as you are able.

Thank you,

Mrs Macaulay  
Maths Lead
