Enquiry Question of the week

Each week we will post an Enquiry Question from the week's learning alongside the answer we would expect. Ask your child the question and see how close your child is to answering the question fully. If they are finding it tricky, break down the answer together and see if they can work on learning more at home.

What is the life cycle of a flowering plant?

They follow a cyclic process of starting a new life, growing, and then coming back to the starting stage (reproducing). There are 6 stages of the plant life cycle. The seed, germination, growth, reproduction, pollination, and seed spreading stages.
