The Titanic

The Titanic was a huge ship that carried over 2000 passengers and crew. It was travelling from Southampton to New York, but it never made it to America. On 14 April 1912, the Titanic hit an iceberg in the sea. This made the ship become very heavy and it started to sink into the water.

Many people on the Titanic were scared, but some brave helpers did their best to keep them safe. They used small boats to help people get away from the sinking ship. Unfortunately, not everyone could leave the ship in time and many people lost their lives.

Even though the Titanic had a sad ending, people still remember what happened to it. This event made people realise how important it is to make sure ships are safe. Because of the Titanic, ships in the future became even safer.

Questions:

1. How many people were on the Titanic?

   a) over 6000
   b) over 2000
   c) over 4000

2. Where was the Titanic travelling to?

   a) Paris
   b) London
   c) New York

3. What did the Titanic hit?

   a) An iceberg
   b) A mountain
   c) A lighthouse

4. What did some brave helpers use to help people escape from the sinking ship?

   a) Airplanes
   b) Small boats
   c) Submarines

5. Where was the Titanic travelling from?

   a) Southampton
   b) Madrid
   c) Birmingham

6. The Titanic made ships safer for the future. Is this true or false?

   a) True
   b) False
