Accessibility Plan

At Dorchester we are committed to providing a website that is accessible to the widest possible audience, regardless of technology or ability. This website has been designed to be as accessible as possible while still visually interesting.

Alternate Style

The website has been designed to work with assistive technologies. We recommend that your computer or device is setup to enhance your entire computer experience. If you are having any difficulties in accessing the site please contact the school office for assistance.

Images and Alt Tags

We have avoided using excessive graphics within the website where possible to ensure quick download times and access to information which cannot be read when in image format.

Browser Compatibility

This website has been designed to work with the following browsers. If you are experiencing issues with the website it is recommended that you install the latest version of the browser.
•Internet Explorer
•Firefox
•Safari
•Google Chrome

Later versions of these browsers should continue to be compatible.

Coding Standards

We have ensured our site conforms to W3C standards for xhtml (E**X**tensible **H**yper**T**ext **M**arkup **L**anguage) and CSS (**C**ascading **S**tyle **S**heets). Adhering to these standards should make our site accessible across browsers which adhere to the same standards, and should make our pages more accessible to those using screen readers and similar devices.

Consistent Navigation

Throughout the site we have tried to keep the navigation consistent and in line with the school intranet.

Contact

If you have any comments about the accessibility of the site please contact our website technician Lorraine Calder through the school office.
