

Multiplying Fractions by Whole Numbers

Work out the calculations below, and put the answers in the boxes.

You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 4 = \boxed{}$$

$$6. \quad \frac{1}{3} \times 3 = \boxed{}$$

$$2. \quad \frac{1}{3} \times 5 = \boxed{}$$

$$7. \quad \frac{1}{6} \times 5 = \boxed{}$$

$$3. \quad \frac{1}{4} \times 3 = \boxed{}$$

$$8. \quad \frac{1}{8} \times 3 = \boxed{}$$

$$4. \quad \frac{1}{5} \times 2 = \boxed{}$$

$$9. \quad \frac{1}{2} \times 2 = \boxed{}$$

$$5. \quad \frac{1}{4} \times 4 = \boxed{}$$

$$10. \quad \frac{1}{2} \times 3 = \boxed{}$$

Multiplying Fractions by Whole Numbers

Work out the calculations below, and put the answers in the boxes.

You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 6 = \boxed{}$$

$$6. \quad \frac{1}{8} \times 9 = \boxed{}$$

$$2. \quad \frac{1}{3} \times 7 = \boxed{}$$

$$7. \quad \frac{1}{10} \times 7 = \boxed{}$$

$$3. \quad \frac{1}{4} \times 9 = \boxed{}$$

$$8. \quad \frac{1}{8} \times 5 = \boxed{}$$

$$4. \quad \frac{1}{5} \times 12 = \boxed{}$$

$$9. \quad \frac{1}{6} \times 6 = \boxed{}$$

$$5. \quad \frac{1}{4} \times 8 = \boxed{}$$

$$10. \quad \frac{1}{9} \times 12 = \boxed{}$$

Multiplying Fractions by Whole Numbers

Work out the calculations below, and put the answers in the boxes.

You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 7 = \boxed{}$$

$$6. \quad \frac{2}{3} \times 8 = \boxed{}$$

$$2. \quad \frac{2}{3} \times 4 = \boxed{}$$

$$7. \quad \frac{5}{6} \times 9 = \boxed{}$$

$$3. \quad \frac{3}{4} \times 5 = \boxed{}$$

$$8. \quad \frac{5}{8} \times 4 = \boxed{}$$

$$4. \quad \frac{3}{5} \times 3 = \boxed{}$$

$$9. \quad \frac{1}{2} \times 6 = \boxed{}$$

$$5. \quad \frac{2}{4} \times 6 = \boxed{}$$

$$10. \quad \frac{4}{8} \times 7 = \boxed{}$$

Answers

Work out the calculations below, and put the answers in the boxes.

You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 4 = \boxed{\frac{4}{2}}$$

$$6. \quad \frac{1}{3} \times 3 = \boxed{\frac{3}{3}}$$

$$2. \quad \frac{1}{3} \times 5 = \boxed{\frac{5}{3}}$$

$$7. \quad \frac{1}{6} \times 5 = \boxed{\frac{5}{6}}$$

$$3. \quad \frac{1}{4} \times 3 = \boxed{\frac{3}{4}}$$

$$8. \quad \frac{1}{8} \times 3 = \boxed{\frac{3}{8}}$$

$$4. \quad \frac{1}{5} \times 2 = \boxed{\frac{2}{5}}$$

$$9. \quad \frac{1}{2} \times 2 = \boxed{\frac{2}{2}}$$

$$5. \quad \frac{1}{4} \times 4 = \boxed{\frac{4}{4}}$$

$$10. \quad \frac{1}{2} \times 3 = \boxed{\frac{3}{2}}$$

Multiplying Fractions by Whole Numbers / Answers

Work out the calculations below, and put the answers in the boxes.

You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 6 = \boxed{\frac{6}{2}}$$

$$6. \quad \frac{1}{8} \times 9 = \boxed{\frac{9}{8}}$$

$$2. \quad \frac{1}{3} \times 7 = \boxed{\frac{7}{3}}$$

$$7. \quad \frac{1}{10} \times 7 = \boxed{\frac{7}{10}}$$

$$3. \quad \frac{1}{4} \times 9 = \boxed{\frac{9}{4}}$$

$$8. \quad \frac{1}{8} \times 5 = \boxed{\frac{5}{8}}$$

$$4. \quad \frac{1}{5} \times 12 = \boxed{\frac{12}{5}}$$

$$9. \quad \frac{1}{6} \times 6 = \boxed{\frac{6}{6}}$$

$$5. \quad \frac{1}{4} \times 8 = \boxed{\frac{8}{4}}$$

$$10. \quad \frac{1}{9} \times 12 = \boxed{\frac{12}{9}}$$

Multiplying Fractions by Whole Numbers

Work out the calculations below, and put the answers in the boxes.
You do not need to simplify your answers.

$$1. \quad \frac{1}{2} \times 7 = \boxed{\frac{7}{2}}$$

$$6. \quad \frac{2}{3} \times 8 = \boxed{\frac{16}{3}}$$

$$2. \quad \frac{2}{3} \times 4 = \boxed{\frac{8}{3}}$$

$$7. \quad \frac{5}{6} \times 9 = \boxed{\frac{45}{6}}$$

$$3. \quad \frac{3}{4} \times 5 = \boxed{\frac{15}{4}}$$

$$8. \quad \frac{5}{8} \times 4 = \boxed{\frac{20}{8}}$$

$$4. \quad \frac{3}{5} \times 3 = \boxed{\frac{9}{5}}$$

$$9. \quad \frac{1}{2} \times 6 = \boxed{\frac{6}{2}}$$

$$5. \quad \frac{2}{4} \times 6 = \boxed{\frac{12}{4}}$$

$$10. \quad \frac{4}{8} \times 7 = \boxed{\frac{28}{8}}$$
