**Enquiry Question**

**EQ: What are the Geocentric and Heliocentric models and how do they compare?**

**A:** The Geocentric model was believed up until the 1500s. The belief was that the Earth was the centre of our solar system and all the other planets orbited around it. However, Nicolaus Copernicus (1473–1543) was the first person to say that the sun is actually at the centre, and all of the planets, including Earth, orbit the sun. Wherever the sun is in our galaxy, Earth and the other planets are always orbiting the sun.
